

Flowless

USER'S GUIDE

Using the Flowless Web App

This guide covers

How to upload a file, request a new project, and use Finder to locate project files.

Quick Start

- Open the Flowless Web App.
- Enter your name.
- Select an existing project, or create a new one if needed.
- Choose a file and upload it.
- Use Finder when you need to locate files later.

1. Upload a File

Use the Upload tab to add a file to an existing Active project.

Flowless

Share project files in the right place, with the right people.

Upload Finder

Your Name
Sarah Chen

Select Project

[PRJ - 2026-003] **Product Launch Campaign** Change project

Check existing files

Upload File

Click to upload or drag & drop

Marketing_Budget.xlsx

Select another file to replace it.

Upload file

Upload tab with an existing project selected and a file ready to upload.

Steps

1**Enter your name**

Type your name in the Your Name field.

2**Select a project**

Search by Project ID or project name, then choose the correct project.

3**Optional: Check existing files**

Use Check existing files if you want to confirm what is already stored in the project folder.

4**Choose a file**

Click the upload area or drag and drop a file.

5**Upload the file**

Click Upload file. Flowless uploads the file and shows a confirmation message.

If the same filename already exists

Flowless will ask whether you want to Replace existing file or Save as new version.

Upload complete message after a successful upload.

After upload

- The file is saved to the project's Google Drive folder.
- The uploaded filename is shown in the completion message.
- If notifications are enabled, recipients may receive an email notice.

2. Create a New Project

If the project you need is not listed, you can request a new project directly from the Upload tab.

The image shows a web interface for a tool called 'Flowless'. At the top, it says 'Flowless' and 'Share project files in the right place, with the right people.' Below this are two buttons: 'Upload' (blue) and 'Finder' (grey). Under 'Upload', there is a 'Your Name' field with 'Sarah Chen' entered. Below that is a 'Select Project' section with a search bar containing the text 'Search by Project ID or name...'. A link 'Refresh project list' is below the search bar. A list of projects is shown: 'PRJ-2026-001 Customer Portal Upgrade', 'PRJ-2026-002 Website Redesign', and 'PRJ-2026-003 Product Launch Campaign'. Below the list is a dashed box with the text 'Select a file to upload'. At the bottom is a large grey button labeled 'Upload file'.

Search for an existing project by Project ID or name.

Steps

1

Search for the project name

Type the intended project name in Select Project.

2

Choose Create new project

If no matching project is found, Flowless shows Create new project.

The screenshot shows the Flowless upload interface. At the top, there's a header 'Flowless' and a sub-header 'Share project files in the right place, with the right people.' Below this are two buttons: 'Upload' (blue) and 'Finder' (grey). A text input field for 'Your Name' contains 'Sarah Chen'. Under 'Select Project', a dropdown menu shows 'Workflow Improvement Initiative'. Below the dropdown is a 'Refresh project list' link. A message box states 'No matching project found' and contains a yellow button labeled 'Create new project'. Below this is a dashed box for file upload with the text 'Click to upload or drag & drop' and 'Select a file to upload'. At the bottom is a grey 'Upload file' button.

When no matching project is found, choose Create new project.

3

Confirm the project details

Flowless creates a temporary Project ID automatically. Enter or confirm the Project Name.

The screenshot shows the Flowless upload interface for a new project. The header 'Flowless' and sub-header 'Share project files in the right place, with the right people.' are at the top. Below are 'Upload' (blue) and 'Finder' (grey) buttons. The 'Your Name' field contains 'Sarah Chen'. Under 'Select Project', a blue box contains 'Create new project:' with a 'Change project' button. Below this, 'PROJECT ID' is 'PRJ-2026-P005831332' and 'Project Name' is 'Workflow Improvement Initiative'. Below the project details is an 'Upload File' section with a dashed box containing a file icon, the text 'Click to upload or drag & drop', the filename 'Approved_Workflow.pdf', and 'Select another file to replace it.' At the bottom is a blue 'Upload file' button.

New project form with an automatically generated temporary Project ID.

4

Choose a file and upload

Select the file and click Upload file.

What happens next?

- The project is saved as Pending.
- The file is uploaded immediately.
- An administrator reviews the project request.
- After approval, the project becomes Active and appears in normal searches.

Important

Pending projects are not shown in normal Upload or Finder search results until an administrator activates them.

3. Find Project Files

Use Finder to search for an Active project, view the files in that project, or open the Google Drive folder.

Finder tab with a project search in progress.

Steps

1

Open the Finder tab

Switch from Upload to Finder.

2

Search for the project

Type part of the Project ID or project name.

3

Select the project

Choose the project from the results list.

4

View files or open the folder

Use View files to display the file list, or Open folder to open the project folder in Google Drive.

Finder with a selected project, file list, and Open folder option.

Finder controls

- Refresh project list: refreshes the list of Active projects.
- View files: shows the files stored in the selected project.
- Refresh files: refreshes the displayed file list.
- Open folder: opens the project folder in Google Drive.

Troubleshooting

Issue	What to do
The project is not listed	Use Refresh project list. If it still does not appear, it may not be Active yet.

A file with the same name already exists	Choose Replace existing file or Save as new version.
A new project does not appear later in search	New projects stay Pending until approved by an administrator.
The file list looks out of date	Use Refresh files in Finder.

Flowless in one sentence

Choose the right project, upload the file, and use Finder when you need it again.
