

Flowless

ADMIN GUIDE

Setup, deployment, and administration

This guide covers

How to configure Flowless, deploy the Web App, manage users and projects, and approve pending projects.

Quick Setup Overview

- Copy the Flowless spreadsheet.
- Open Admin Sidebar and configure Settings.
- Deploy the Apps Script project as a Web App.
- Authorize Flowless when prompted during deployment.
- Open the deployed Web App once, then reload the spreadsheet.
- Use the Flowless menu to open the Web App or Admin Sidebar.
- Manage users, projects, and pending approvals.

1. Configure Settings

Open Flowless → Open Admin Sidebar, then use the Settings tab to configure the installation.

Admin Sidebar > Settings

Fields

- **Parent Folder**: Optional. If you leave it blank, Flowless can create its default parent folder when the first upload needs one.
- **Admin Email**: Receives new project review notifications.
- **Sender Name**: Display name used in Flowless notification emails.
- **Team Name**: Optional label shown in notification emails.
- **App URL**: Detected automatically from the deployed Web App.

Tip

Parent Folder accepts either a Google Drive folder ID or a full folder URL.

2. Deploy the Web App

Open Extensions → Apps Script, then create a Web App deployment.

New deployment > Web app (account details hidden)

Deployment steps

1

Open Deploy → New deployment

In Apps Script, create a new deployment and choose Web app.

2

Set Execute as

Use Me so the Web App runs with the owner's access to Drive and Sheets.

3

Set Who has access

Use Anyone if you want any user with the link to open the Flowless Web App.

4

Deploy

Click Deploy. If authorization is requested, complete the steps below.

Authorize Flowless

During the first deployment, Google may ask the Flowless owner to authorize the Apps Script project. This is a one-time setup step for the account that owns and deploys this copy of Flowless.

Authorization prompt during deployment

A

Click Authorize access

In the deployment dialog, click Authorize access to begin Google authorization.

About the Google warning

Google may display “Google hasn’t verified this app.” This can appear because Flowless is a copied Apps Script project that accesses Google Drive and Sheets and has not been verified as a public OAuth app. Regular users who only open the deployed Flowless Web App do not need to complete this authorization.

Google verification warning (account details hidden)

B

Open Advanced

If the warning appears, click Advanced.

Google hasn't verified this app

The app is requesting access to sensitive info in your Google Account. Until the developer [redacted] verifies this app with Google, you shouldn't use it.

[Hide Advanced](#)

[BACK TO SAFETY](#)

Continue only if you understand the risks and trust the developer

[Go to Flowless v1.0 \(unsafe\)](#)

Advanced options (account details hidden)

C

Continue to Flowless

Click [Go to Flowless v1.0 \(unsafe\)](#), review the requested permissions, and click Allow.

5

Copy and open the Web App URL

After deployment completes, open the Web App URL once.

Deployment completed screen (IDs and URL hidden)

Important

After you open the deployed Web App once, return to the spreadsheet and reload it. This allows Flowless to recognize the deployed Web App and show Open Web App in the custom menu.

3. Use the Flowless Menu

After deployment and reload, the spreadsheet menu provides shortcuts to the main entry points.

Flowless custom menu

- Open Web App: Opens the Flowless end-user interface.
- Open Admin Sidebar: Opens the admin controls in the spreadsheet.

4. Manage Users

Use the Users tab in the Admin Sidebar to add users individually, or paste users directly into the Master_Users sheet.

The screenshot displays the Flowless Admin interface. On the left, a spreadsheet titled 'Master_Users' is open, showing columns for User_Name, Email, Notify, Role, and Created_At. The right sidebar contains the 'Flowless Admin' panel with tabs for Pending, Projects, Users, and Settings. The 'Users' tab is active, showing an 'Add User' form with fields for Name, Email, a checked 'Notify' checkbox, and a 'Member' role dropdown. Below the form is a 'Search Users' section with a search bar and a 'Refresh Users' button. The bottom of the interface shows a navigation bar with tabs for Master_Projects, Master_Users, Settings, Upload_Logs, and Admin_Action_Logs.

Users tab in Admin Sidebar

Add users in the sidebar

- Enter Name and Email.
- Choose whether Notify is checked.
- Select a Role, such as Member.
- Click Add User.

Bulk add users in Master_Users

Master_Users before automatic completion

1

Paste User_Name and Email

Paste or type names and email addresses into the first two columns.

2

Let Flowless complete the row

Flowless automatically inserts the Notify checkbox, sets the default Role, and fills Created_At.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N

Master_Users after automatic completion

5. Manage Projects

Projects can be managed in the Projects tab, or entered in bulk directly in Master_Projects.

The screenshot displays the Flowless Admin interface. The main window shows a spreadsheet titled 'Project_ID' with columns: Project_ID, Project_Name, Folder_URL, Status, Created_At, and Internal_ID. The data includes five projects, all with a status of 'Active' and a creation date of '2026/08/17 13:03:28'. The sidebar on the right, titled 'Flowless Admin', has tabs for 'Pending', 'Projects', 'Users', and 'Settings'. The 'Projects' tab is active, showing a search bar and buttons for 'Normalize Project Master', 'Activate Selected', and 'Deactivate Selected'.

Project_ID	Project_Name	Folder_URL	Status	Created_At	Internal_ID
PRJ-2026-001	Customer Portal Upgrade		Active	2026/08/17 13:03:28	
PRJ-2026-002	Website Redesign		Active	2026/08/17 13:03:28	
PRJ-2026-003	Product Launch Campaign		Active	2026/08/17 13:03:28	
PRJ-2026-004	Office Relocation Project		Active	2026/08/17 13:03:28	
PRJ-2026-005	Workflow Improvement Initiative-1		Active	2026/08/17 13:03:28	

Projects tab in Admin Sidebar

Projects tab

- Search for a project in the Projects tab.
- Use Activate Selected or Deactivate Selected to change project status.
- Use Normalize Project Master when needed to clean up project data.

Master_Projects before automatic completion

Paste or type the Project ID and Project Name.

Flowless automatically sets Status to Active and fills Created At when those fields are blank.

Master_Projects after automatic completion

- Folder_URL remains blank until the first file upload creates or confirms the project folder.
- Internal_ID is left unchanged unless you manage it separately.

6. Approve Pending Projects

When a user creates a new project in the Web App, the project is recorded as Pending and appears in the Pending tab.

Project_ID	Project_Name	Folder_URL	Status	Created_At	Internal_ID
PRJ-2026-P024841104	PRJ-2026-001 Customer Portal Upgrade	https://drive.google.com/drive/folders/188Q9WkZu_YvOgn	Pending	2026/08/17 2:49:22	

Pending tab with project approval controls

Approval steps

- 1 **Select the pending project**
Choose the project from the Pending list.
- 2 **Review the uploaded file and folder**
Use Open File if needed to inspect the uploaded file.
- 3 **Enter Final Project ID**
Replace the temporary ID with the final project ID.
- 4 **Enter Final Project Name**
Confirm or adjust the final project name.
- 5 **Choose options**
Rename Drive folder and Send notification can be checked as needed.

6

Approve and Activate

Click Approve and Activate to set the project to Active.

What approval changes

The project status becomes Active, the final Project ID and name are saved, the folder can be renamed, and approval notifications can be sent.

7. Operational Notes

- New projects created from the Web App are Pending until approved.
- Active projects are available in Upload and Finder search.
- Folder_URL is normally created or updated during upload.
- Upload_Logs records upload activity.
- Admin_Action_Logs records approval and admin actions.

Troubleshooting

Issue	What to do
Open Web App is not shown in the menu	Confirm that the Web App has been deployed, open the deployed URL once, then reload the spreadsheet.
A new project stays Pending	Open the Pending tab, review the request, and approve it.
Users pasted into Master_Users are incomplete	Check that User_Name and Email are present. Flowless fills Notify, Role, and Created_At automatically.
Projects pasted into Master_Projects are incomplete	Check that Project_ID and Project_Name are present. Flowless fills Status and Created_At automatically.
Uploads are not going to the expected place	Review Parent Folder in Settings and check the project's Folder_URL.

Flowless admin in one sentence

Configure it once, deploy the Web App, then use the sidebar and master sheets to keep projects and users up to date.
